

S2 Architecture

Homework

- Buildings are designed by ARCHITECTS. In Glasgow we have a large amount of amazing buildings.
- Buildings are made up of ROOMS and each room has a purpose. For example a kitchen is used for preparing and eating food.
- In lockdown we may be feeling a lack of space. You may have to share a bedroom if you have brothers or sisters and you may want space for yourself. Many children build dens in their house or garden
- ACTIVITY - I want you to design a 'den' or if you want to make a den inside a room in your home. Please ask your parent or career before you do this. You can also design a den on paper if it's not possible to make the den. Think about what you would need in your den. It could have trap doors, ladders or bean bags. It could be as small as you like for example using a cardboard box. If you draw your den please use colour if you can and add notes. Have fun and use your imagination.
- You can email the homework by photographing it and sending it as a attachment. gw10carsongillian2@glow.sch.uk
