

# **S<sub>3</sub> Graphic Communication: Wk 3: Manual Sketching**

# Manual Sketching

**Before the holidays you had a bit of practice sketching household objects in a variety of different styles.**

**I am looking to build your sketching skills and rendering skills a little bit further in this new task by adding a design element.**

# Manual Sketching

**Task 1: Produce 6 design ideas for a desk lamp. These can be sketched out in 2D or 3D in any style that you like.**

**Try and include graphics that communicate information such as how parts will go together or zoom in on smaller details**

# Manual Sketching

**Task2: Produce 6 design ideas for a bin design. This can be a product for a school playground, a park, a kitchen anything!**

**Designs can be sketched out in 2D or 3D in any style that you like. Try and show different angles and if you can use either pens, or pencils to render them to show light/shade. These don't need to be coloured pencils a normal drawing pencil would be fine.**
